

UNIVERSAL VIRAL COLLECTION KIT

PRODUCT DESCRIPTION

Labaid Universal Viral Collection Kit, 3 mL, is a viral transport system designed to collect and transport viruses, chlamydiae, mycoplasmas and ureaplasmas at ambient temperature. The kit maintains viability of organisms while inhibiting antimicrobial contaminants and promoting safety. The viral collection kit combines a flexible minitip collection swab and 3 mL vial for collection. It is one of the only systems that may be stored and transported at 0°C to 25°C—all in one formulation.

- Antibiotics inhibit bacteria and fungal flora
- Maintain microbial viability for safe transport
- Cost efficient large 3 mL media fill volume allows for multiple tests on the same specimen

BVTK-003

1600 nasal swabs (100/bag) and 1600
5 mL tubes with 3 mL inactivated specimen
preservation solution (100/box).

COMPETITIVE ADVANTAGES

SAFE TRANSPORT
Microbial viability for
safe transport

PRESERVE SAMPLES
Inhibit bacteria and
fungal flora in samples

VERSATILE
Multi-purpose usage
with design variations

LEADING QUALITY
High density materials and
stringent QC standards

COMPANY INTRODUCTION

Biomed Resource, Inc., was founded in 2001 to supply quality products for biotechnology and healthcare industries. As a manufacturer and wholesaler, we offer an extensive array of products, including: medical and laboratory plastic wares, clean room supplies, and hospital disposables. With factory operations overseas and warehouse headquarters in California, we have strategic locations to minimize delivery time and provide an unparalleled level of convenience for our customers. All our products are FDA registered and well-proven in the market.
